

Host Page Discovery

Kristen Sadlocha

The main purpose of this webpage is to provide a space to showcase a variety of work that I created during the semester for MACA 1840 at Macomb Community College. I want the viewer to be able to learn a bit about what this class teaches, see examples of projects, and have a brief introduction to who I am as well. With that being said, I want the design and tone of this webpage to represent my personality and my style.

Speaking of design, I found some good inspiration from:

<https://www.siteinspire.com/websites?page=2>

<https://sprout.place>

<https://danielaandmoe.com>

<https://lazarev-case-12.webflow.io/?ref=onpagelove>

<https://webfieldmanual.com/design.html>

<https://www.bandiapp.co.uk>

Once I found some inspiration, I realized that I wanted my site to be clean, vibrant, and fun. I quickly found these two color schemes to match those words (<https://vimeo.com/440615357>) (<https://www.behance.net/gallery/79466103/Zenoti-Software-Solutions>). Additionally, most of the corners on any buttons and images will be rounded to appear more friendly, and icons will remain simple looking as well.

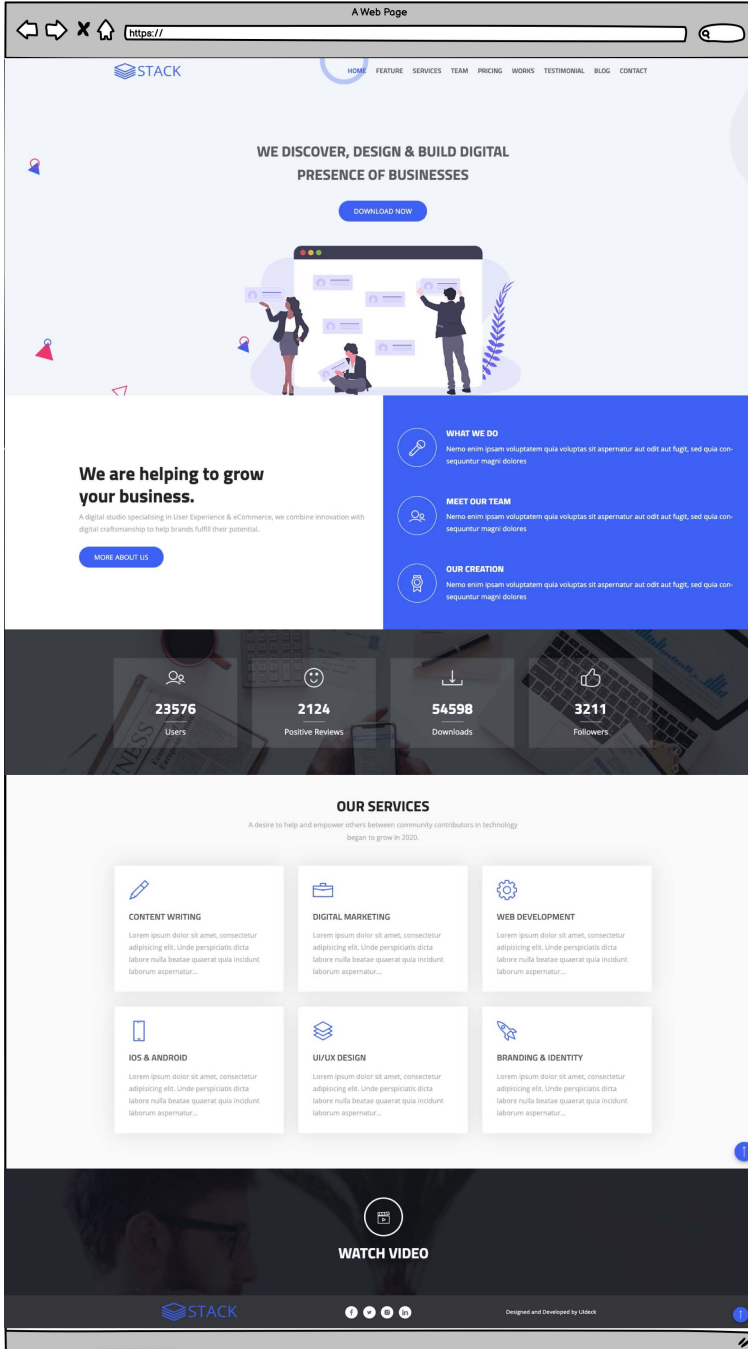

I found a template (<https://preview.uideck.com/items/stack/>) that I really enjoy and decided to use it as a base for my site. It can be downloaded from <https://onpagelove.com/templates/bootstrap-framework/page/3>. I really enjoy the about section on this site because it splits the page in half and has some icons on one half that look really appealing. I also enjoy the counter section because of the animation that plays as it pops on. Additionally, I like the services section because the cards are very simple, but I might merge some card elements from other templates like <https://demo.graygrids.com/themes/craft/> and <https://bootstrapmade.com/demo/templates/FlexStart/> to make it more stylized to my tastes.

Content List

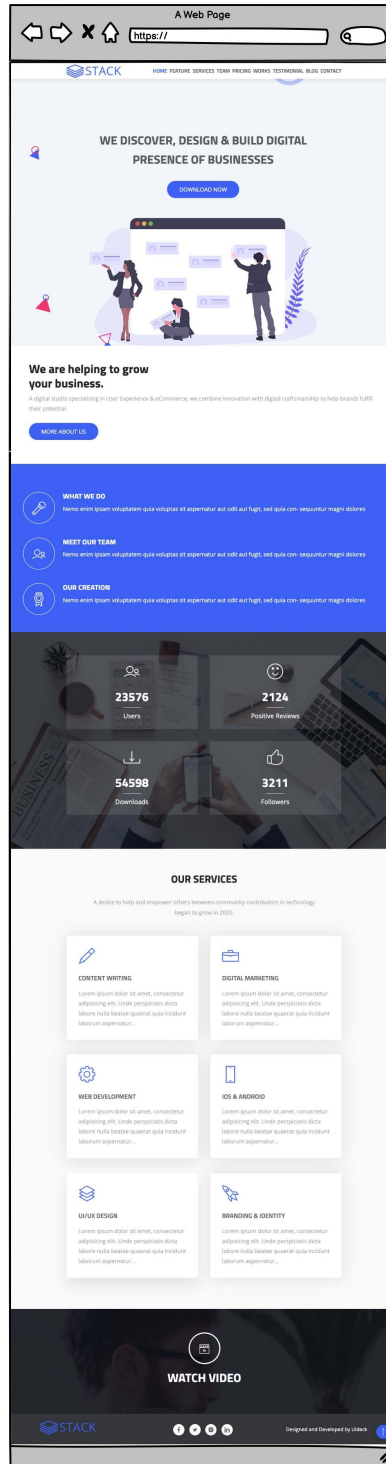

Content	Form	design/build information
Browser tab	<title></title>	Kristen Sadlocha - Web 2
Name	text, p	in intro paragraph
MACA 1840	text, h1	header
MCC logo	img	white, foreground
Website Purpose Statement	text, h3	"A showcase of projects completed in class during Fall 2021."
Navigation buttons to assignments	cards	rounded edges, icons, brief descriptions
An identity element about you: image(s), illustration, favorite quote, statement	text, image, logo	Photo of myself (foreground), logo in header and footer, "My name is Kristen Sadlocha and I am a Motion Graphics Designer, tea enthusiast, and an avid pin collector! If you enjoy the projects you see on this page, take a trip over to kristensadlocha.com to see more of my work!"
Nav bar	nav	sticky nav, hamburger collapse

Final Web Page

NICE TO MEET YOU!

My name is Kristen Sadlocha and I am a Motion Graphics Designer, tea enthusiast, and an avid pin collector! If you enjoy the projects you see on this page, take a trip over to kristensadlocha.com to see more of my work!

THE CLASS

MACA 1840 strongly focuses on user-centered design and goes in-depth about how businesses utilize their websites to actively and positively engage their users.

THE SKILLS

During class you can strengthen and use your content strategy and design skills to assess, design, and properly apply user interactions to a variety of web pages.

THE GOALS

After this class, you will be able to make a thorough design plan, utilize a professional workflow, and both create and code an intermediate website that meets current trends.

PROJECTS

FLEX ELEMENTS
A web page, built using flex, that showcases three Detroit locations that offer some awesome beverage options.

WHOLE BROWSER DESIGN
A simple build for Yolks and Jokes that focuses on using flex to layout the web page's content and background images across the whole browser.

WEB LAYOUT PLAN
This is a compilation of three web pages and their basic planning which includes content creation, wireframing, and rough page builds.

RESPONSIVE DESIGN PLAN
A compilation of everything used to design a responsive web page for Lift Off Gym that would be functional on various devices, such as a phone or tablet.

RESPONSIVE ARTBOARDS
This is the final design mock-up for Lift Off Gym and it demonstrates how the web page's content will shift around at each major breakpoint once it's built.

WEB FIELD MANUAL
This build is a tribute to the official Web Field Manual site and features some of my favorite articles that pertain to the importance of animation in web design.

PODCAST MODAL
A simple four square modal build that provides brief descriptions and sample episodes of various podcasts.

STYLE TILES
Two different styling directions that would apply to the content on this host page.

HOST PLAN
A compilation of all the planning documents that went into the production of this very host page.

MEDIA & COMMUNICATION ARTS

The Media & Communication Arts program at Macomb Community College offers multiple different specialties and courses that are super informative and fun! If you're interested in checking out everything that this program has to offer, click on the MACA COURSES button! Also, if you want to see more web projects from other students, feel free to hit the WEB PROJECTS button below!
